**Weisberg transcript
says FBI told Oswald
was agent for FBI**

Author of several books on the Kennedy Assassination, Harold Weisberg of Frederick, spent 11 years having a Warren Commission document declassified. Now released, the transcript of the commission's proceedings, shows that the commission discussed a report that Lee Harvey Oswald had been an undercover FBI agent.

Discussing Oswald's reported FBI connections were then Supreme Court Chief Justice Earl Warren and President Ford, then a Michigan congressman, and other Warren Commission members. They discussed the report Jan. 22, 1964.

It was the Warren Commission which investigated the Presidential assassination and concluded that Oswald alone had killed President John F. Kennedy. Local author Weisberg has systematically criticized the commission's conclusion.
